# **Report Cards**

This year, we will be emailing out report cards to streamline the process and reduce paper usage. If you prefer to receive a paper copy, please feel free to contact the school, and we'll be happy to accommodate your request.

Additionally, we want to inform you that the reports will not include learning statements. Instead, this valuable information is now provided within the curriculum plans, ensuring a more comprehensive understanding of your child's progress and learning journey. Thank you for your understanding and continued support as we strive to enhance communication and efficiency in our reporting process.

## Home / School Communication.

Effective communication between home and school is paramount for the success of your child. Regular updates and insights from parents enable us to better understand each child's needs, strengths, and areas for growth. When parents are actively engaged in their child's education, students feel supported and motivated to excel. Your input not only enhances our understanding but also fosters a collaborative environment where we can work together to ensure your child's academic success. We encourage you to reach out to your child's teacher with any questions or concerns you may have. Together, we can make a significant difference in your child's learning journey.

Near the end of Term 1, an opportunity for a formal parent/teacher interview will be made available. However, please do not wait until this time if you have concerns. Conversely, if your child's teacher has concerns, they will endeavour to speak to you as soon as possible.

## **Classroom Volunteers**

If you're interested in volunteering in the classroom, please don't hesitate to reach out to your child's teacher or speak with the principal. Your involvement makes a meaningful difference in our learning community, and we warmly welcome your participation. Let's work together to create enriching experiences for our students.

### **School Resources**

If you find yourself facing challenges in providing the required materials for your child's school needs, please don't hesitate to inform your child's teacher or reach out to the principal. We understand that circumstances can vary, and we're here to support you and your child. Your communication allows us to find solutions together and ensure that every student has what they need to thrive academically.
